

AUSCOL

The "Right Way" to recycle cooking oil

Oil Kaddy System® Spent Oil Transit Kaddy

WITH PUMP

Used cooking oil can now be transported from your fryer to your collection tank in a safer, more secure and more hygienic manner.

Safety

- Empty direct from your fryer into the kaddy to greatly reduce the risk of burns injuries.
- Reduces the risk of slips or falls due to the lock down lid which prevents oil spills during transportation.
- Reduces the risk of manual handling injuries since there is no longer a need to lift heavy pails.

Savings

- Proven labour savings.
- The opportunity to reduce Lost Time Injuries and Workers Compensation premiums.
- Fewer washings needed for garbage and/or storage areas.
- Patented low watt heater for low running costs.

Sanitation

- No messy clean up of buckets or pails.
- Maintains a clean, non-greasy floor.

Security

- Employees do not need to go outside to dispose of spent oils.

Must be Used in Conjunction with an OKS TM Spent Oil Collection Tank

Specifications	model	DCp-5L	drain height	244mm
	capacity	47.5L	height	920mm
